Benefit from our high-level expertise, a world-class infrastructure (HTE platform) and a broad library of heterogeneous catalysts.
FOR YOUR HETEROGENEOUS CATALYTIC HYDROGENATION...

Selectivity and productivity are among the most important requirements of an economically useful process. The optimal catalyst system consists of a sound combination of a catalyst, a solvent, and an additive that act at suitable reaction conditions (temperature, pressure, mixing). In order to meet these requirements, a sophisticated screening and development concept is crucial.

...WE ADJUST OUR WORK PACKAGES ACCORDING TO YOUR CUSTOMER NEEDS

- in-depth understanding of your requirements
- proven concepts and innovative solutions
- tight deadlines
- highest quality demands
