

Peptide Stability

Peptides are prone to both chemical and physical instability, which can lead to loss of biological activity, reduced efficacy, and immunogenicity. This makes stability testing a critical step in ensuring the safety and effectiveness of peptide-based therapeutics.

With deep expertise in peptide chemistry and advanced analytical capabilities, Solvias' stability programs provide the data you need to make informed decisions and ensure consistent product quality, from research to commercial stage.

Our state-of-the-art facilities and cutting-edge equipment are designed to support stability studies at every stage of the peptide development process. We help you identify the most stable peptide sequences, optimize formulations to preserve stability, and assess long-term stability to establish accurate expiry dates, evaluate impurity risks, and support regulatory submissions.

solvias

Why partner with us?

- CRO
- Founded in 1999
- 800+ team members
- 175+ PhD-level scientists
- GMP, GLP, ISO9001 certified
- 23K m² of lab capacity
- 700+ customers worldwide
- 5 centers of excellence
